

Name	Christina J Hopfe
Photograph	
Email address	C.J.Hopfe@lboro.ac.uk
IBPSA affiliation	Member of IBPSA England
Position and function in IBPSA local/world	Director at large IBPSA News editor-in-chief
Member of IBPSA since..[year]	2005
Affiliation	Sustainable Building Design, Building Energy Research Group, Loughborough University
Short paragraph describing background and interests not exceeding 200 words	Christina Hopfe is a Senior Lecturer in Sustainable Building Design at Loughborough University, England. In her role at Loughborough she is also the Programme Leader for Low Carbon Building Design and Modelling. Christina's expertise covers areas, such as: uncertainty and sensitivity analysis; decision support techniques in the design process also under the consideration of uncertainties; new techniques in the optimization of buildings (multi-objective optimization techniques, meta-models) in BPS. She has been teaching modules in building performance simulation and low carbon design/ modelling the past 7 years and has supervised three PhD students in the field of energy simulation. She is currently supervising five PhD students conducting research in the BPS domain.
