| Position and function in IBPSA local/world | Board Member of IBPSA |
| Member of IBPSA since..[years] | 1999 |
| Affiliation | Osaka University |
| Short paragraph describing background and interests not exceeding 200 words | My research field is urban energy system. Related to building simulation, I have been developing the city-scale energy end use forecasting models for residential and non-residential sector. In addition I have been studied modeling and commissioning of heat source plant in DHC system and building HVAC system. |
