IBPSA affiliation	IBPSA Netherlands Flanders
Position and function in IBPSA local/world	Affiliate representative IBPSA-NVL
Member of IBPSA since..[years]	2002
Affiliation	Research manager
Short paragraph describing background and interests not exceeding 200 words	<p>In 1987 my first Job at TNO institute of applied physics was to develop a building simulation program. This program developed over time and is for a long time defacto standard for overheating risk assessment in the Netherlands (one of the few countries in which overheating risk assessment is done for almost every building).</p> <p>Involved in several EU framework research projects like COMBINE, WIS, INTUBE and ECODISTRCT.</p> <p>In 2002 I shifted jobs from TNO to VABI (a software company bringing building simulation to the Dutch practice). As a research manager I give training on building simulation for Vabi users and one or two times year a guest lecture at the Technical University of Eindhoven.</p>
